**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Yano et al. (U. S. PAT. 6,901,502).

In claim 1, Yano et al. teaches all claimed features in Fig. 1, a semiconductor processing device formed on a semiconductor substrate comprising: a central processing unit (18); an SRAM-type field programmable gate array (19) which establishes a logic circuit (logic function) based written thereto; a nonvolatile memory (11) which stores the logic building data establishing the logic circuit in the SRAM-type field logic programmable gate array; and a configuration circuit (20) which implements a configuration operation for said SRAM-type field programmable gate array by using the logic building data stored in said nonvolatile memory (11), wherein said configuration circuit (20) includes a function of transferring the logic building data in said nonvolatile memory to said SRAM-type field programmable gate array at the event of power-on reset (col. 10; lines 29 and 40).

Art Unit: 2819

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 6-11 appear to comprise allowable subject matters.
